Applicant's election of Species B in the reply filed on 9/27/04 is acknowledged. Because applicant did not distinctly and specifically point out any errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

However, Applicant's identification of the claims readable on the elected species is not agreed with; we believe that claims 6-8, & 11-26 read on the elected species.

Since claim 6 has been allowed, claims 9 & 10 have also been considered.

Claims 1-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim.

The abstract of the disclosure is objected to because the Abstract should not include legal phraseology such as "said" and "means". Correction is required. See MPEP § 608.01(b).

Claims 9 & 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 9, there is no antecedent for the "bore".

Claims 6-8 & 11-26 are allowed.

Claims 9 & 10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

With regard to claim 6, the prior art does not disclose a toy including a ball having a connection portion; a mechanism for attachment to a user's limb, having a flexible portion and a rigid connection part; an elastic cord coupled between the ball and rigid connection part, and including a knot which connects different parts of the cord to one another; and a sleeve of shrinkable material which is shrunk to cover the cord and knot.
